1843 (July 31 and August 1): The matching pair of entire letters from the Gonsalves Pereira correspondence to Rio de Janeiro, the earlier cover used the day before the Bulls Eyes were issued from Santos with clear despatch datestamp and rated '40' reis to pay, the second cover mailed on the day of issue of the Bulls Eyes with Santos cds in black for August 1, 1843 again without adhesive as Santos only received its first shipment of the new issue in October. A fine and rare pair.

4007 30 reis deep black, Early Impression from the First Composite plate, State A, very early printing-the famous mint corner block of four from upper left of sheet (positions 1-2/7-8) with enormous margins all round and in a very deep vibrant shade, showing slight burr rubbing of the ink in top margin, minor bends and slight crease at upper left in margin only and slight stain on position 8, however these are negligible faults of no importance - a magnificent rarity with large part original gum. By far the finest of only three mint blocks of four known of the first stamp to be issued in the American continent, this multiple being of impeccable *Provenance* and a highlight of Worldwide Philately.

THE 30 RÉIS BULL'S EYES INTERPANEL:

"ONE OF THE MOST DESIRABLE AND VALUABLE ITEMS OF BRAZILIAN PHILATELY"

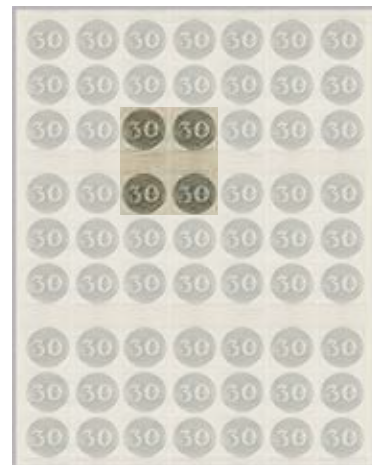

Excerpts from the article "One of the most desirable and valuable items of Brazilian Philately" originally published by Paulo Comelli in MOSAICO magazine, year XII – December 2002 – nr 36.

THE HISTORY

First Period – 1950 to 1974

In the magazine "Brasil Filatélico" n°s 167/168 from 1974, Hugo Fraccaroli tells us that this rarity was discovered by the well-known philatelist **Luiz Figueiredo Filho** from São Vicente, São Paulo (near Santos), in 1950. "Then this piece was bought by the famous philatelist **Niso Vianna**, and now it is with his widow (1974)".

Mr. Niso Vianna (died in 1971) published his memories in the magazine "Brasil Filatélico" n°s 141/142 from 1964: "Among all my purchases, I consider that the most interesting and valuable one was made through Figueiredo Filho, who bought it at 'Coda Philatelic House' (underlined by the author) in Rio de Janeiro. It was a block of four of the 30rs Bull's Eyes with a ten millimetre's space between the stamps, what proved the existence of a plate unknown by 'Napier'. There is not another piece like this up to now". Niso Vianna took part in many of International Exhibitions and got several Gold Medals (there were not Large Gold Medals by then): at EXFIRA'50 in Buenos Aires; at LISBOA'53 in Portugal; at FIPEX'56 in New York; and at EXFIMAYO'60 in Buenos Aires, where he also received the Exhibition Grand Prix.

3rd Plate - 54 Stamps of the 30 reis

Second Period – 1974 to 1985

At the LUBRAPEX'74 in São Paulo, the "Interpanel" was exhibited for the first time as part of Mr. **Reinaldo Bruno Pracchia's** collection. With the propose of finding out how this rarity came to Mr. Pracchia's hands, I appealed to Mr. Harald Meyer's memory, a philatelic dealer in São Paulo. He kindly told: "that the widow authorised the late Mr. Itamar Bopp (another important Paulistan collector) to sell the Bull's Eyes and D. Pedro's collections that had been Mr. Vianna's joy for many years". Mr. Meyer went on: "A short time before LUBRAPEX'74, Mr. Bopp sold the whole Bull's Eyes collection to Mr. Pracchia by Cr\$ 2.000.000,00 (two million cruzeiros), but kept the D. Pedro's collection for himself". This value was equal to US\$ 290.00,00 (two hundred and ninety thousand dollars). The price paid by Mr. Pracchia and transferred to the widow paid for both collections.

Mr. Pracchia got the most important Brazilian philatelic awards at that time. He won three Large Gold Medals: at ESPAÑA'75 in Madrid and at ARPHILA'75 in Paris. In 1980 he won the greatest award at LONDON'80, where he got the Championship Class Grand Prix.

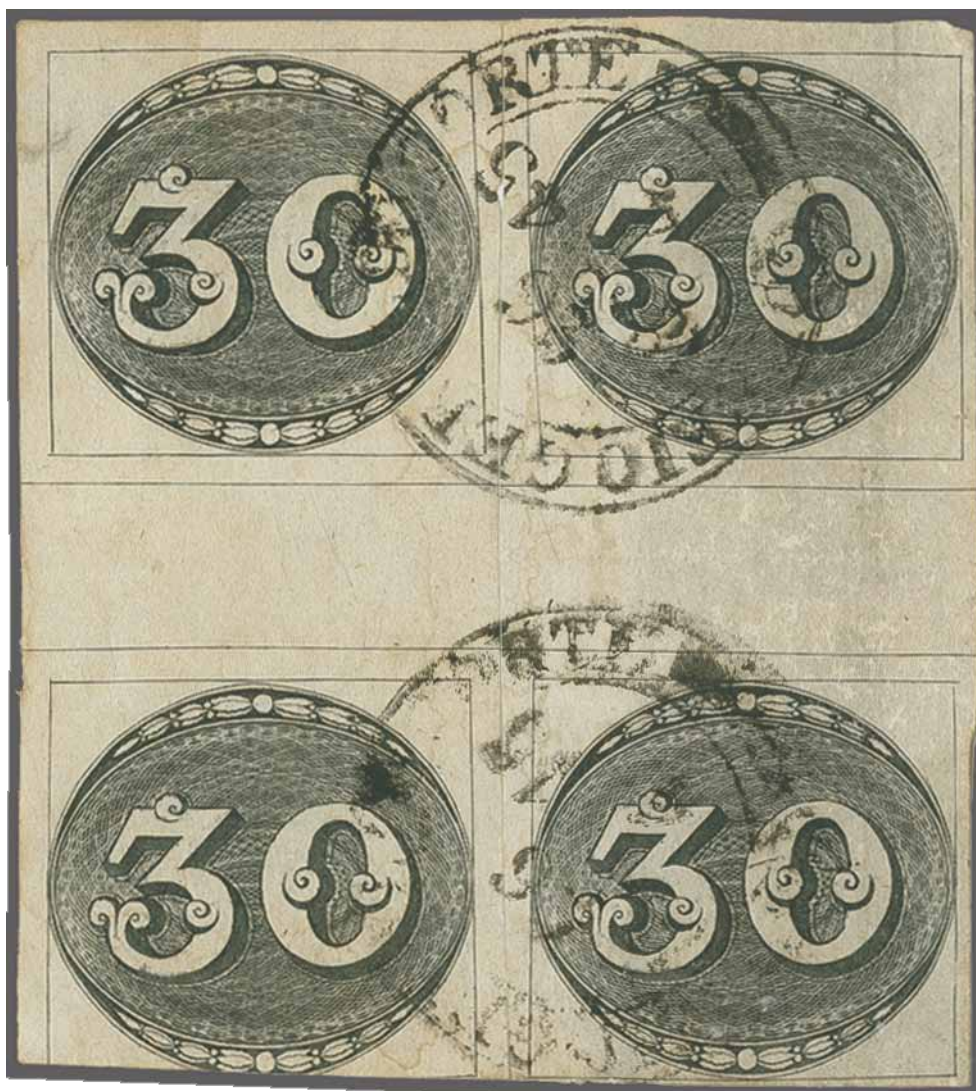

In 1986, Mr. Pracchia sold his "Empire Numerals" entire collection to the international stamp auction house Habsburg, Feldman S/A in Switzerland. The 30 reis "Interpanels" were included in the whole set.

Third Period – 1986 to 1993

The "Amazon Collection" (title given by David Feldman) auction was held in Zurich from November 16 to 21, 1987. They gave out an exclusive catalogue with the "INTERPANEL" on the front cover. The description stated: "These two 30rs pairs are also the only ones existing. The crowning piece of this collection and credibly the most valuable in Brazil Philately". I attended this auction to try to buy some pieces for my collection and also several others for **Mr. Angelo Lima**. After a successive battle of bids, I got the "Interpanel" for Mr. Angelo Lima by the highest offer equal to US\$ 100.000,00 at that time. Mr. Angelo Lima got the two biggest international awards: International Grand-Prix at PHILEXFRANCE'89 and the Championship Grand Prix at PHILANIPPON'91.

Fourth Period – 1993 to 2013

In 1993 Mr. Lima made up his mind to sell his collection. From November 1 to 6, 1993, David Feldman held an auction with a significant number of Mr. Lima's pieces, but not the "Interpanel". In January or February 1995, **Mr. Hugo Goeggel** was spending his holidays in a ski resort in Switzerland, when he received a phone call and several pieces from Mr. Lima's collection were offered to him. Since then, the "Interpanel" belonged to the extraordinary Bull's Eyes collection of Mr. Goeggel.

4052 30 reis black, Early Impression, the Interpane used block of four, Third Composite plate, positions 15-16/3-4 between upper and middle panes, the "founding piece" for the third plate theorised by Napier, being two separated and re-joined vertical pairs in a deep shade cancelled by "Correio Geral Da Corte" datestamps (April 26, 1845) in black. Together with the Pack Strip and Xifopagus, these two pairs show the format of the Third plate, these being the sole surviving examples of the interpane 30 reis. Illustrated and discussed in José Klope "Die Ochsenaugen" on page 18. A few imperfections noted but due to the consummate scarcity of this piece these should be ignored as this item is a major rarity of Classical Philately. Unique.

4053 30 reis grey, Worn Impression, Second Composite plate, State A, positions 1-3/7-9/13-15, the famous used block of nine all cancelled six times by dated PERNAMBUCO SHIELD cancellation (January 29, 1844) in black (Ayres 1548). Some manuscript showing on reverse from the original cover and insignificant ironed out creasing, with excellent margins all round (the block was originally cut into and margins have been added at top and at base) and showing the full marginal vertical guide line at left. Illustrated in "Bulls Eyes" by Brookman on page 3. The largest known multiple of the 30 reis in an excellent state of preservation for such a large multiple. A major rarity of South American philately.

4054 30 reis grey, Worn Impression on yellowish paper, a horizontal pair used on 1843 entire letter to Lavras, Minas showing the considerable plate wear during the first month of issue, the entire clearly dated August 28, 1843 and folded for exhibit display cancelled by CORREIO GERAL DA CORTE / 29-8-1843 datestamp in black. The pair with large margins all round, has been removed from the back of the cover and re-affixed. Despite the small faults, a dramatic and rare first month of use entire, of which only three are recorded. Cert. RPS (1996).

- 4122** 60 reis grey-black, Intermediate Impression on yellowish paper, the magnificent vertical block of ten from the Second Large plate, State B, positions 5-6/11-12/17-18/23-24/29-30 and thus from the top right corner of the sheet, with outer frame line visible at top. Huge margins all round and neatly cancelled by "Correio Geral Da Corte" datestamps (April 8, 1845). But for a horizontal crease in margin between the third and fourth rows a faultless and delightful multiple of the utmost importance in Brazilian philately. Illustrated in "Bulls Eyes" by Brookman on page 9, when the multiple was a vertical block of twenty and in the German edition of José Klope "Die Ochsenaugen" published by Wolfgang Maassen on page 47 as a block of ten, this being both the finest and most attractive of the two multiples. A truly wonderful Exhibition piece for the specialist.

The Dr. HUGO GOEGGEL Collection (Part 1)

Colombian Air Mail 1919-1930

(see also lots 61-63 in the 177 Corinthila catalogue 'Europe & Overseas')

William Knox Martin Experimental Flight 1919 from Barranquilla to Puerto Colombia

The 1917 current 2 centavos carmine-rose was overprinted in 10 definable types horizontally, the sheet being cut into strips prior to sale, thus vertical multiples and blocks cannot exist. Eugenio Gebauer and Jairo Londoño de Tamayo believed there to be 200 examples printed, Dr. Hugo Goeggel & Carlos Valenzuela project a total of 300 examples printed. There were 160 letters carried on the First Flight on June 18, 1919, the mail being dropped at Puerto Colombia and the plane returning to Barranquilla without test landing. Either mint or used, these stamps represent some of the great rarities of Airmail philately.

'Colombia' greeted by the residents of Girardot

4443✚ Surcharged VALOR 10 CENTAVOS on 50 c. pale green (Type b) handstamped diagonally reading down to right, a fine used example on flown 1921 cover from Girardot to Neiva, cancelled by oval SOCIEDAD COLOMBO ALEMANA / CORREOS AEREOS / GIRARDOT with further fine strike on reverse, used with 1917 1/2 c. yellow-bistre pair and single 2 c. carmine-red tied by two line NAVEGACION AEREA / NEIVA in violet and by Neiva duplex (Nov 4) in bluish ink. A rare and fine cover.

Note: The start of the scheduled SCADTA service, September 19, 1921; a flight from Girardot to Neiva was installed at a surcharge of 10 centavos for a single letter. The journey overland, of just 150 kms, took four days on horseback.
